- *The Best Clinically Studied Ingredients*
- *Powered by MSM*
- *NASC Quality Seal*
- *Third Party Tested*
- *100% Satisfaction Guarantee!*

## Vet Formulated and Vet Approved!

Our company was founded in 1997 by Ronald Breteler, Ph.D. and Cousin Paul Klein Breteler, who practices naturopathic medicine.

Their combined passion for animals and commitment to research led to the development of unique nutritional supplements for pets sourced with the world's best raw ingredients.

In 2007, Dr. Breteler began collaborating with Dr. James St. Clair, a veterinarian hyper-focused on canine joint health.

Together, they strengthened Kala Health's worldwide impact on animal health wellness.

*Dr. James St. Clair, Marty, Albert, and Frankie*

# # 1 in Taste!

# comfort<sup>®</sup>

Enhanced with 30% natural flavors like real chicken, pork, and beef, our supplements are formulated for maximum deliciousness, aroma, and texture that appeals to all dogs' sensory capacities.

Even the most finicky dogs will gobble them up.

## The Best Clinically Studied Ingredients

We go the extra mile to source the absolute best ingredients on the planet. And we make sure that everything we put into our supplements is clinically proven to help improve the health of pets.

Here are some of them:

**OptiMSM<sup>®</sup>**: The purest form of human-grade MSM. It's distilled multiple times for 99.99 percent purity. Made in the USA

**Ester-C<sup>®</sup>**: The best vitamin C for supporting the immune system as it remains in pets' systems longer than regular vitamin C. Made in the USA

**GreenGrown Glucosamine<sup>®</sup>**: A safer form of glucosamine that is vegetarian-friendly, shellfish-free, and free from allergens Kosher Certified, and Certified Non-GMO by Eurofins

**Hyal-Flex<sup>™</sup>**: An advanced fermentation technology and purification process are used to develop this improved form of hyaluronic acid with 99 percent or greater purity

**Chondroitin Sulfate**: A 90 percent pure, food-grade bovine chondroitin that has a low molecular weight for faster absorption

**Natural Flavorings**: Added vitamins, minerals, and trace nutrients. Made in the USA with real chicken and pork flavors.

## Powered by MSM

Methylsulfonylmethane (MSM) is a safe organic molecule essential for life and a rich source of needed sulfur.

Sulfur is naturally occurring in the body but is also found in lots of plants and foods, like fruits, grains, and milk. It remains a nutrient that both humans and pets don't get enough of in their diets.

MSM has been proven to:

- Promote healthy joints
- Improve mobility
- Relieve muscle soreness
- Reduce inflammation
- Enhance skin and coats
- Strengthen the immune system

Inspired by the amazing health benefits of MSM, we use the same grade of MSM that's in our human supplements in all our animal supplements. That's because dogs deserve the same quality of MSM as we do.

# NASC Quality Seal

We are proud to be a member of the National Animal Supplement Council (NASC), a leading nonprofit advocate of animal safety and standardization in the animal health supplement industry.

We are committed to quality, vigilance, and continuous improvement to promote the well-being of companion animals.

The NASC Quality Seal on our products means that we've successfully passed an independent facility audit every two years. We make our supplements in an FDA-approved facility, adhere to stringent labeling requirements, are subject to random product testing, and real-time product monitoring and mandatory adverse event reporting.

For more information:

[www.nasc.cc](http://www.nasc.cc)

## Third-Party Tested

Before our products go into production, every ingredient undergoes physicochemical and microbiological testing (e.g., total aerobic count, yeast and mold, salmonella, E. coli, staphylococcus, and heavy metals).

After production, our tablets are also analyzed for core tablet hardness, finished tablet thickness, core tablet weight, tablet disintegration, and friability (percentage loss and damage).

Before we ship our products to your vet hospital, our supplements are third-party tested to ensure the active ingredient levels on the label are really in every product and certified by an independent lab.

# 100% Satisfaction Guaranteed!

# comfort<sup>®</sup>

We are positive that your clients and their pets will love our products.

To assure we are always delivering a quality product, please let us know your thoughts.

We are proud to work alongside you to deliver quality products to your customers.

# Distribution and Sales

- Our cGMP manufacturing and production facilities are in Oakdale CA
- 2 warehouse locations: Oakdale CA and Meriden CT to ensure quick shipping across the US
- Dedicated team of inside and outside salespeople

# Antioxidant – Immune Support

Our vet-formulated and vet approved **Comfort<sup>®</sup> Antioxidant<sup>™</sup>** is a powerhouse of antioxidant protection that helps slow the aging process and boost the immune system by fighting free radical damage caused by environmental stresses, toxins and chemicals including vaccines and flea/tick medications.

## Benefits:

- Enhanced with 30% natural flavors for maximum palatability your client's dog will love!
- Tasty scored chewable tablets are easy to administer
- Fast acting, benefits are usually observed within one to two weeks
- Maintains and supports immune function
- Beneficial for aging dogs and dogs with arthritis and joint problems
- Help to reduce conditions such as skin allergies
