

# Product Specification Sheet

Created and approved by Vets, **DermGard** is formulated with the perfect blend of Omega 3, 6, and 9 Essential fatty acids, fish oil, OptiMSM, vitamins, and minerals. DermGard is a valuable tool to assist in your therapies towards achieving balanced skin health whether acute or chronic.

### When to use DermGard:

DermGard is not meant to be a treatment but instead an added nutritional therapeutic support for the following:

### Common Clinical Presentations:

- Pruritus
- Alopecia
- Seborrhea
- Collarettes
- Erythema
- Dry, Flaky, Dull Hair and Coat
- Hyperpigmentation
- Papules
- Pustules

### Common Underlying disease processes that disrupt the health of the skin:

- Atopic Dermatitis (Environmental)
- Pododermatitis
- Pyodermas (Hot Spots)
- Flea Bite Hypersensitivity
- Dermatophytosis
- Malassezia

### Enhanced Taste Experience:

- 30% natural flavors per tablet for maximum palatability
- Flavors are made with US sourced chicken and pork
- Chewable scored tablets that are easy to administer

### Contains:

**MSM (OptiMSM® methylsulfonylmethane):** MSM is a safe organic molecule essential for life and a rich source of needed sulfur. Sulfur remains a nutrient that pets do not get enough of in their diets. MSM is proven to enhance skin and coats, reduce inflammation, and strengthen the immune system.

**Vitamin A:** is one of the more critical supplements essential for maintaining healthy skin and coat.

**Vitamin E:** assists in the treatment of skin conditions such as dry, itchy skin, hotspots, and dandruff.

**Essential Fatty Acids:** Omega-3, 6, and 9 from fish oil. Omega 3 fatty acids (EPA and DHA) can modify inflammatory skin responses in healthy dogs. Typical pet foods lack Omega 3 but are rich in Omega 6. DermGard™ also includes Omega 6 to balance Omega 3 and 6.

**Vitamins B1, B2, B6, and B12:** work together to improve skin and coat health and helps with skin allergies while boosting the immune health system.

**Zinc:** is a vital mineral for maintaining a healthy skin and coat, and for normal pigmentation of the coat hair. Zinc also helps to prevent shedding, hair loss and dry flaky skin.

## DermGard

### For Dermatologic Support
